My next Shaving, 41/42, will be on order N^o 3 for 5000 lbs. & will be completed in about 4 weeks.

Can you favor me with an other order for 5 to 10,000 lbs? If there is no advance on Nickel in England, the price will be the same as last, but if it should advance before the order gets there, it can be omitted, or carried at the advance, subject to your election.

My friends say the competition to get it is so great, & the ore is so scarce, it is almost sure to go up, but if an order is sent at once they think they can make a contract at the present price

Phil: Jun 16. 1860,

Memo. for the Director, in regard
to the complaint of better gold
from N.Y. Assay Office,

I have made a practical
test of the ductility of the gold
slip sent by Mr. Sumner. One
gramme was melted, with
110 Milligrammes of copper,
in a pipe clay crucible, with
a little brax. The button resulting
was rolled into a long slip;
which with the remaining
piece of fine gold is herewith
returned, and thanks for
itself.

If Washoe Silver was
used in parting, in the case
complained of, a little oxide
of antimony might have demanded

in the parted gold and
caused all the trouble.
Now could it be entirely
removed without extra
care, as the carbon of
the Black Lead Pot would
have a tendency to revive
the antimony. Gold
nearly pure, containing
a trace of that metal,
may be quite malleable
and ductile; but and
this is a very remarkable
fact) when copper is
added, the alloy becomes
granular and brittle.

I mention these facts
without presuming to
offer an opinion as to
the real cause of
difficulty in the partici-
ular case complained of

to a supply of cents for the use of the Post
Master at New York.

I have from the Treasury
given a prepress to put in orders on the
distribution of cents, and, although in conse-
quence of the great demand from all sections
of the United States from offices and private
business, we cannot furnish the Post Office
at New York with \$200 in March. The case
endeavor to furnish half of that amount weekly
& I have so informed the Post Master,

Examiner should advise branch interest on demand or time loans should be collected at least every six months; and that mere payment of interest is not considered a renewal (formal extension agreement is signed by all parties or the laws of the State provide otherwise. A new note, if practicable, at each maturity date is preferable.

Dear Sir

The 25th of March last, I
sent you by mail Fifty Dollars, to
pay for cents to be sent me at this
place — The receipt for which was
sent by you to Pittsfield, Mass, from
whence I obtained it after it had been
advertised — I then wrote you, asking
that if my name was entered on your
books as belonging to Mass, it might
be changed, to Maine — The time (14
weeks) before which the cents could
not be sent, having expired two weeks
ago, ~~And~~ the cents not having ar-
rived, I have thought it possible, they
might have been sent to Mass, instead
of this State, and write this to enquire
concerning the matter —

Can we exchange silver coin for gold coin at your office or at the assay office in N.Y. (the latter place preferred on account of lesser charges for transportation) and if so at what rates for half dollars, quarters, dimes and half dimes. Our object in making the inquiry is this. We contemplate entering into a certain trade with Canada, payments to be made us in American silver coin, and as the margin of profit will be very small we are desirous of making the best disposition possible of the silver. If you will be pleased to give us the desired information at your earliest convenience you will greatly oblige.

The Collector of Customs at that port has been instructed
accordingly.

Very respectfully,

Your obedient servant,

Acting Secretary of the Treasury.

James P. Ball, Esq.,
Director of the Mint
Philadelphia

July 1st 3.

Sir,

The usual monthly count and examination made at the close of business on the 30th ult. exhibited the following balances in the hands of the Treasurer of the Mint, viz:

In Gold coin,	\$209,767.50
" Silver "	29,662.57
" Copper Fund,	68,660.93
" Ordinary Fund,	73,169.62
" Reserve & Sinking Fund,	729.18
	<u>\$381,989.80</u>

Corresponding with the balances as stated upon that Officer's Books of Account.

An examination into the condition of the Mint generally gave satisfactory evidence that the business of the institution is conducted with care and fidelity.

Yours P. Chase,
Secretary of the Treasury,

Very Respectfully Your Obedt. Servt.

I have the honor of 29 Inst to rec^y
your letter of July 28 re. advised
you of the arrival by the "Clamonia"
of 2 cases of Nickel marked:

U. S. Mint N. 5 & 6, requesting
free permit. These cases were
thereupon entered and on the
5th Inst sent shipped by Currier
& Oakes & Co. by perfect
condition as the shipping receipt
in our possession & our shipping
slight will prove. Having
received no other shipments of
Nickel at & since that time
we could not by any means
have made the mistake of
sending you the wrong cases.
As you state having received
the said Nickel in cases marked
no 51 & 52 and the cubes
sent us not having the appearance
of our 99% grade (which however
is no proof whatever of its not
being 99% quality. —) it
strikes us forcibly that either
the Rail Road Co. must have
delivered you the wrong cases
or

that same hour or other and
shipment to you must have been
conferred with another and
from some other source.

As matters stand we deem
it quite necessary to have
an analysis made of the sample
you have sent us, as the per-
centage of contents of cases
N. 87 & 82 cannot be a criterion
for contents of U.S. Dist. N 5 & 6.

We trust you will upon closer
investigation find our shipment
of 5th Inst all right & as that
case shall feel obliged for your
permission to draw upon you
in settlement of the respective bill.

Hopps & Kuhn in Weiss,
Gentlemen,

Your letter of yesterday has been
received.

On further enquiry I learn that, the two cases
of Nickel received from you on the 11th ult. were
so packed & boxed that it was deemed advisable to
put the Nickel in other stronger boxes, which were
done before the Assay samples had been taken and
the boxes closed up. The Foreman, of the
Melting Room, who received the cases in question,
reported the numbers to be 81 & 82. Before the
Assay was completed it appears that the
boxes in which the Nickel was packed, were
used for fire wood, or rather disposed of in that
manner to get them out of the way. It is not
improbable that the numbers 5 & 6 were also on
the boxes. There was no possibility of mistaking
other cases for yours because we purchase no other

New York Aug. 7, 1863

Sir,

I send enclosed my requisition upon the Department for \$30,000, which, I respectfully request, may be immediately forwarded with your approval.

In a private note recently received from Dr. Sanderma, I am asked to describe for your information, the "Sulphuric Acid Battery" which was extemporized at this Office for defence against the Rioters. I fear that in giving so formidable a name to a very simple affair I may have given an exaggerated idea of its importance.

The Treasury & Assay Office buildings in New York are protected in the basement and principal stories by strong iron doors & shutters. It was anticipated that in the event of an attack by the mob, efforts would be made to force these doors & windows; or, failing there, to gain an entrance

by ladders through our second story windows, which are entirely without shutters. As our supply of men and arms for the defence of the buildings was limited, I deemed it prudent, and eminently appropriate, that the Assay Office should fall back on its Carboys!

At the most exposed points, ^{in the second story} porcelain partition jars were placed with Carboys of Sulph. Acid ready to be decanted at a moment's notice. Pitchers & india-rubber gloves were also at hand, & men selected for the duty of dispensing the acid in liberal doses.

The rioters did not visit us, but we have been informed that at one time they were meditating a night attack upon us, and were dissuaded from the attempt by learning that we had bomb-shells, and "sulphur-acid" batteries at all the windows!

Very respectfully

Sir:

In your Bullion accounts for the 2^d q^r 1863, now in process of revision, the amount of Cent Metal purchased during the said quarter is debited in the Cent Bullion a/c as amounting to 2,315.723 ⁹/₁₆ ozs the value of which is by calculation \$154,381.60. The vouchers, transmitted with the a/c show that 166,163 ¹/₂ lbs were purchased, which amount is equal to 2,423,217.70 ozs. the value of which is \$161,547.85, making a difference between this sum and the amount charged in your Cent Bullion a/c of \$7,166.25. I have therefore to request that you will inform this Office, where the discrepancy arises.

I transmit herewith Gold Bullion Certificate of Deposit No 910 for endorsement by Messrs Orexel & Co, in whose name the certificate

Minist of the United States,

Philadelphia, December 8, 1863

Hon S. S. Chase

Sec. Treasury

Sir,

In my last Annual Report I recommended the disuse of Nickel, in our cent coinage and the substitution of the Alloy lately introduced in France & England, called Bronze - It is composed of 95 per cent copper 3 per cent Tin & 2 per cent Zinc, and makes a beautiful & ductile alloy. This change in the material of the cent is not only desirable in itself as an improvement in the quality & appearance of the coin but becomes an absolute necessity from the advanced & still advancing price of Nickel - our entire dependence for a supply upon the foreign market - paying for it in gold or its equivalent and the probability of a failure to secure an adequate supply for the future, at any price, - the difficulty of melting - the destruction of dies & machinery &c. thus increasing the cost of production which will soon exceed the value of the product, if the price

of Copper, labor &c continues to advance as it is almost certain to do, in that event the coinage of the cent must cease. It is not proposed to change the size or devices of the cent only the weight. The weight of the new coin will be 48 grams or $\frac{1}{10}$ of Troy. Enclosed I send you specimens of the bronze cent, which is superior in every respect to the slimpy nickel.

I also propose for your consideration the coinage of a two-cent piece, same material & double weight, of the cent, and with such devices & mottoes as may be approved by you. This piece would be a great public convenience and its coinage in my opinion should be authorized. I enclose some specimens. The devices are beautiful & appropriate, & the motto on each, such, as all who fear God love their Country will approve. I prefer the "Shield and arrows" to the "head of Washington" as the obverse of this coin. They are submitted for your consideration. If you approve the change of material & coinage of the two-cent piece or either, I will if you desire it prepare a supplement to existing laws, to be by you submitted to Congress for their action. I sincerely hope that you will concur with

one in the views now submitted, & that through
your efficient aid the proposed change in materi-
al denomination may be authorized by law.
Some action prompt & immediate is necessary, as
I very much fear if Nickel is retained as a
component part of the cent, the supply will fail
or the increased cost of production compel a
cessation of the coinage.

With sentiments of great
respect, I am yours truly,
(Lynia) Jas Pollock
Director

Sir!

In reply to your favor of yesterday we beg to inform you that, about two weeks ago, we have received advices from our friends on the other side that they have sent off: "U. S. Mint # 18 to 19," two ^{each} cases ~~containing~~ 500 lbs 99% Nickel, which are overdue now at this port.

On account of the prospects of the blockade of the German ports, our friends have directed this shipment by the way of Havre, which may have caused the unusual delay, but we think that the cases will come in by the first steamer.

We expect to receive advices about further shipments of Nickel by one of the next steamers, and shall inform you which quantity is coming for your department.

Making inquiries
as to production

of Silver Mines
of Andrew Hauck
of same being monopolized
by England

Dec 24, 1863,

Robert B. Swain Esq.
Supt. Br. Mint, San Francisco

Dec 24. 3.

It is important that I should be able intelligently to answer enquiries, or make suggestions, in regard to the production of the precious metals in our country, and the course they take. I now write to ask some questions in regard to the silver mines of Nevada, which, from your proximity, and from the fact that San Francisco is the great mart for the sale of shares in those mines, and the shipping port for their produce, I trust you will be able satisfactorily to answer. You can reply at your leisure.

We are informed, that the production of metallic silver has already been very large, and promises still larger yield, for a long time to come; that nearly the whole amount is shipped to England, either in ~~ore~~ or in bars. Hence this general statement I have used to ask,

1. Can you form any reasonable estimate of the amount of silver already produced, say to the end of

this year 1863.

2. Are the mines largely owned by British or foreign share holders; or is the capital largely supplied from abroad.

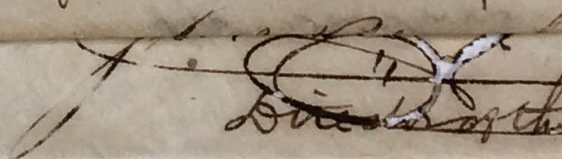

3. Are the Mines mostly foreigners, a knowledge of ~~the~~ reasons can you assign, why this bullion is monopolized by England.

5. What condition of things would cause a flow of this silver to the Atlantic States.

You will see the drift of these inquiries, and may feel disposed to communicate other matters bearing upon the subject, with ^{as} particularity.

As the matter stands, it seems to us that England has practically the use and benefit of this vast treasure within our bounds, leaving us the mere glory of jurisdiction, and the superiority of the Provisional Government.

With great Respect.

Sec. of Treasury

Dear Sir

I enclose herewith a "three cent" bronze coin as a specimen of size & weight, not of device, for that can be greatly improved, & made much more significant, & artistic; but, with all the improvement that could be made, I would not recommend its coinage.

I have directed the preparation of the 3 ct. piece in Aluminum - also the half dime, & when completed will forward them with description - cost &c.

The prompt action of Congress on this bill changing the material of the cent coinage is absolutely necessary, as the supply of nickel cannot much longer be obtained. We have now a supply for ten days or two weeks, but no advance of any to arrive. When the present supply is exhausted the coinage of the cent must necessarily cease.

unless we can procure nickel from other than
our usual sources, I do not know when it can
be purchased. We are entirely dependent on the
foreign market. I hope, by your influence,
Congress will at once act upon this matter.

Yours very truly

STOW AND DOUBLET PAPER AND PASSES ON GOVTS

Hon E. B. Washburne:

December 23. 3.

Dear Sir,

Your letter of the 19th inst to L. R. Snowden Esq. (former Director of the Mint) enquiring ^{in presenting to} the probable cost of a suitable medal to ^{be presented to} General Grant, under the recent Joint Resolution of Congress, has been referred to me for reply.

The Mint possesses peculiar facilities for striking medals, both as to the requisite machinery and experienced Artists and Workmen. All of our National ^{medals} were struck at this institution, without cost to the Government, except for the bullion and labor employed, not including, however, the Designs and Dies:

The cost of a medal depends very much on its size and the character of the devices. A gold Medal, finely executed, of the following ^{Size} ~~Size~~ ^{Device} ~~Device~~ ^{Reception} ~~Reception~~, would cost about Two Thousand Dollars:

Size. 3½ inches in Diameter.

Obverse Representation of Major General

Grant (in full uniform) Mounted - A. broken
cannon. Cannon balls &c on the ground - Legend
Major General Ulysses S. Grant. Exergue or inscription
beneath the base line of the Engraving - Resolution
of Congress, December 18, 1863.

Reverse - Branches of Oak and Laurel
crossed so as to form a blank for a suitable
inscription. At the point where they are
crossed there should be a shield surmounted
by an Eagle. An inscription something like
the following, would be appropriate: "Presented
to Major General Ulysses S. Grant, in testimony
of the high sense entertained by Congress, of
his distinguished services in the war for
the suppression of the Rebellion."

The time required to have the Dies Engraved,
hardened, and the medals struck, would be
about three months.

If we had been informed of the
size of the Medals, and character of the
Reverses, a more accurate estimate could
have been prepared.

Respectfully, Yours,
J. A. Colwell
Director.
